

Curriculum Vitae

BEHRANG QASEMIZADEH

Email: behrangatoffice@gmail.com

Web: <http://pars.ie>

Present Position: Since January 2016, I have been a postdoctoral researcher at the [at the DFG Collaborative Research Centre 991](#) of Heinrich-Heine-Universität Düsseldorf. Under the supervision of Prof. Laura Kallmeyer, I am involved in the *SFB 991* project. With an emphasis on frame semantics, this project is a multidisciplinary investigation of the structure of representations in language, cognition, and science. I am a member of the B08 project that involves the use of data-driven methods for hierarchical frame induction—that is, for empirical investigation of theoretical discussions in the context of the SFB 991 project.

Long Term Research Goal: The study of language, and perhaps other sensory information, as a key for investigating the fundamental research question “how does the human mind work?”. As a technologist, my aim is to facilitate man-machine and man-man communication. From the complementary perspective of linguistic anthropology, I am interested in the study of consequences of technological developments in the area of computational linguistics. Simply put, I am striving for a holistic study of communication systems and preparing for the day that man prefers communicating with machines.

Current Research Areas: Computational linguistics; natural language processing; information extraction.

Current Research Topics of Interest: Vector-based distributional methods for formalising natural language structures; random projections and embedding techniques; sketch-based methods; (inter-)active learning techniques.

Personal Information

Gender: Male.

Country of Residence: Germany.

Education

Ph.D. Computer Science:

Date: 08 July 2015.

Thesis Title: Investigating the Use of Distributional Semantic Models for Co-Hyponym Identification in Special Corpora.

Awarding Body: [National University of Ireland, Galway](#).

Advisor: Prof. Dr. Siegfried Handschuh.

Master’s Degree in Computer Engineering – Artificial Intelligence and Robotics:

Date: 19 April 2006.

Master’s Thesis Title: A Framework for Extracting Temporal Ontology From Annotated Multimedia/Video Data.

Awarding Body: [Iran University of Science and Technology](#).

Advisor: Prof. Dr. Mohammad Reza Kangavari.

Additional Studies:

Participant of the [ENeL training school 2016: Tools and methods for creating innovative e-dictionaries](#), University of Ljubljana, 17 May 2016 to 20 May 2016.

Research graduate visitor to the [APEX Data & Knowledge Management Lab](#), Shanghai Jiao Tong University, 20 April 2011 to 27 June 2011, collaborated with [Tianqi Chen](#) and [Haofen Wang](#).

Participant of the 17th European Summer School on Logic, Language and Information (ESLLI05), Edinburgh, UK, August 2005.

Participant of the Jadertina Summer School in Empirical and Computational Linguistics (JSSECL), Zadar University, September 2006.

Participant of the 3rd DGFS Computational Linguistics Fall School, Bochum, Germany, September 2005.

Honours and Awards

Full Ph.D. scholarship from the Science Foundation Ireland, 2009–2014.

Two months travel grant in the context of the Marie Curie action IRSES under Grant No. 24761 (Net2).

Master's thesis research grant from the [Iran Research Institute for Information and Communication Technology \(ITRC\)](#).

Outstanding student at the Computer Engineering Department of Iran University of Science and Technology in the academic year 2003–2004.

Ranked under the top 0.001% among more than 10,000 participants of the Iranian nationwide university entrance exam for graduate studies (known as *Konkour*) in the field of computer science in the academic year 2003–2004.

Ranked under the top 0.001% among more than 500,000 participants of the Iranian nationwide university entrance exam for undergraduate studies in the category of mathematics and physics in the academic year 1998–1999.

Skills

Natural Languages:

English: Fluent;

Modern Persian (i.e., Farsi): Native;

Arabic: Basic Knowledge of Formal (i.e., Quranic) Arabic;

* I am open to new experiences in life and thus willing to learn new languages!

Computer Programming:

JAVA: Fluent, almost like a native speaker. In addition to Java core class libraries, I have a solid background in:

- Natural Language Processing: Expert knowledge of the Stanford Core-NLP, MALT Parser, Apache OpenNLP libraries, as well as limited lab experience with the GATE and Apache UIMA frameworks;
- Data Analytics and Machine Learning: Considerable knowledge in using Apache Common Math, Apache Mahout, WEKA, JAVA-ML, DL4J, a variety of Support Vector Machines implementations such as LibSVM, as well as libraries for common linear algebra operations such as JAMA, COLT, and ND4J;
- Markup Languages and Formalisms: Familiar with HTML, XML, RDF (as well as how to use the Apache JENA framework for the ‘Semantic Web’ application development);
- Other: I am experienced with distributed TCP/IP, agent-based architectures. In addition, I have explored Apache Hadoop and have a good theoretical knowledge and understanding of its related projects such as Apache Drill, Pig, and SPARK. I am currently exploring GPU-accelerated computing technologies.

Prolog: Fluent in ISO dialect. Specifically, I used the LPA Win-Prolog including the following toolkits:

- Chimera Agents: An agent development and deployment tool;
- TCP/IP Toolkit: For distributed processing over a network;
- ProWeb Server: Dynamic server based application development;
- ProData: Database interface toolkit;
- Intelligence Server: For embedding Prolog codes in programming languages such as Java and C.

NOTE: I am comfortable in reusing and modifying other programming languages such as Python, Scala (i.e., functional programming), C, C++, etc. For me, learning a programming language or technology is not an end in itself. It is, however, an integral aspect of the process of realising vague research ideas to real-world applications, or to investigate research hypotheses. Hence, I am ready to learn new languages and technologies to meet the demands of research projects that I get involved in.

Additional Computing Skills:

Web Servers: Apache Tomcat; Apache HTTP Server.

Database: Relational databases such as MySQL, H2DB, Microsoft SQL Server, as well as NoSQL databases such as Redis, Berkeley DB, Neo4J and Kyoto Cabinet.

On-line Document Management System: Drupal (with a little bit of PHP hacking if necessary), Google Sites (and its relevant Java APIs).

Web Interface: HTML, a small bit of PHP, and enough of [Vaadin](#) (JAVA APIs that exploit Google Web Toolkit).

Office Productivity: Microsoft Office, \LaTeX /TikZ/PGF.

Project Management: Microsoft Project (i.e., Gantt charts for project structuring, employee scheduling, tracking dependencies and work progress), and Basecamp.

Teamwork: Subversion, JIRA, Confluence, Microsoft Visual SourceSafe, and basic Git.

Operating Systems: Linux, Windows.

Soft Skills:

I am committed to my personal development in key areas such as health, work ethic, positive attitude, communication, time management, leadership, and teamwork. I am interested in the concept of *Mindfulness at Work*—that is, achieving balance.

Professional Research Experience

January 2016 – Present:

Role: Postdoctoral Researcher.

Institute: [DFG Collaborative Research Centre 991, Computational Linguistics Department](#), University of Düsseldorf.

Principal investigator: Prof. Dr. Laura Kallmeyer.

October 2014 – November 2015:

Role: Wissenschaftlicher Mitarbeiter (Scientific Assistant).

Institute: [Chair of Digital Libraries and Web Information Systems](#), University of Passau.

Principal investigator: Prof. Dr. Siegfried Handschuh.

Contributions:

- Teaching: Text mining practical course (8 ECTS); this includes designing course content based on Birds et al.'s *Natural Language Processing with Python* for 7 weeks of 6 hours theoretical/hands-on teaching, followed by defining project topics, and assisting students to achieve their project goals in the remaining of the semester (performance records are available upon request).
- Occasional contributions to research grant proposals: Successfully acquired a grant from NVIDIA for 4 Tesla cards (within the so-called [CUDA research centre scheme](#));
PI: Prof. Dr. Siegfried Handschuh.
- Disseminating research findings:
 - Participating and presenting research at the colloquiums co-organised by the chair of digital humanities and digital libraries at the University of Passau;
 - 4 research papers.

April 2009 – October 2014:

Role: PhD Candidate and Research Assistant¹.

Institute: INSIGHT Centre for Data Analytics²; National University of Ireland, Galway.

Principal investigators: Prof. Dr. Siegfried Handschuh, Dr. Paul Buitelaar.

Operational Manager: Dr. Brian Wall.

Contributions:

- Pursuing a Ph.D.: Investigating corpus-based, distributional approaches to natural language semantics. This study was carried out through a scholarship that was provided in the context of *Lion* and *Lion 2* projects—with the theme of *enabling networked knowledge*—which are supported by the Science Foundation Ireland under grant numbers SFI/02/CE1/I131 and 12/RC/2289.
- Occasional contributions to research deliverables:
 - Design and development of the *MLTagger* tool: A support vector-based key-phrase extractor.
 - Design and development of a Distant Reading tool from corpora: An information extraction tool that extracts triples and generates a graph visualisation in a PDF format.
 - Design and development of the TextBarCode tool: A visual text analytic tool for exploring natural language documents, particularly for knowledge-workers in the domain of digital humanities.
 - Contributing to knowledge transfer deliverables involving the *CISCO Systems, Inc*: Designing algorithms and developing codes for domain-adaptive extraction of topics (keywords) from chat logs and email conversations between employees in a *Jabber*-based communication system (e.g., for expertise finding, customer support, etc.).
- Disseminating research findings:
 - Several research publications (see list of [publications](#)).
 - Development of the ACL RD-TEC: A language resources for the evaluation of terminology extraction and classification methods consisting of manually annotated terms in the [ACL Anthology Reference Corpus](#). This resource is published by the European Language Resources Association (ELRA) under [catalogue number ELRA-T0375](#).³
- Other activities:
 - Assisting new students (2013/2014) with disabilities through an initiative by the [disability support service](#) office at the National University of Ireland, Galway.

December 2007 – April 2009:

Role: Research Assistant.

Institute: [Speech and Vision Systems; The Institute of Electronics, Communications and Information Technology](#), Queen's University of Belfast.

Principal investigator: Dr. Ian O'Neill, Dr. David Linton.

Other Collaborators: Dr. Philip Hanna, Dr. Chris Fowler, Dr. Darryl Stewart, and Dr. Paul Miller.

Contributions:

- Prototyping a Natural Language Dialogue System for Surveillance Video Retrieval:

The role was defined in the context of the ISIS Project (An Integrated Sensor Information System for Crime Prevention) founded by the Engineering and Physical Science Research Council (EPSRC) under grant number EP/E028640/1. I was in charge of bridging the semantic gap between natural language utterances and surveillance video data in a complex multi-agent system. To achieve the objectives of the project, a Prolog-based distributed environment for information consolidation from heterogeneous resources (and various programming environments such as C++ and Java) was developed. The task encompassed the development of (a) a generic high-level event detection system, (b) translating detected events into and from natural language descriptions, and (c) a basic dialogue management system and domain-specific strategies for information seeking dialogues (which are defined in the context of the project for footage retrieval).

¹I served as research assistant from June 2012 to August 2013; during the rest of this period, I was a PhD student.

²Formerly known as the [Digital Enterprise Research Institute \(DERI\)](#).

³ISLRN: 699-305-362-089-6.

- Disseminating research findings:
 - 4 peer-reviewed conference papers (see the list of publications).
 - Active participation in project meetings and reviews.

Prior to December 2007:

Basic Language Resources Kit for Modern Farsi (aka. Persian).

Date: May 2005 – December 2007 (before immigrating to the UK).

Role: Founder and organiser of a set of self-founded (volunteer-based) projects for developing language resources and processing tools for Farsi.

Main Contributions:

- Integration of Farsi into the [MULTEXT-East framework \(officially since version 4\)](#):⁴
 - Devising morphosyntactic specifications for Farsi in the MULTEXT-East Framework;
 - Manual annotation of a Farsi translation of Orwell's 1984 corpus.⁵
- A lexicon of Farsi stems, available from ELRA ([Catalogue Reference: ELRA-L0087](#)).
- Research publications as well as a set of tools (in Microsoft Visual C++ and Java) for Farsi electronic-texts standardisation.

Master Thesis Research Grant: Video Semantics and Retrieval

Date: August 2005 – April 2006.

Institute: [Iran Research Institute for Information and Communication Technology \(ITRC\)](#) and Iran University of Science and Technology.

Principal investigator: Prof. Dr. Mohammad Reza Kangavari.

Role: Member of a team of two Master's degree students for the development of a prototype system to extract events from subtitled videos and visualise them in a time line.

Contributions: A working demo system developed in C# as well as technical reports and research publications.

Contributions to several commercial products that involve language technologies for Farsi

- Farsi text-to-speech;
- Spell checking;
- Post-processing the output of an optical character recognition system.

* Please see the below [section](#) for details of professional experience during this period of time.

Teaching Experience

Text Mining Practical : Summer Semester 2015, University of Passau, Bavaria, Germany.

Text Mining Practical : Winter Semester 2014, University of Passau, Bavaria, Germany.

Data Storage and Retrieval: Summer Semester 2007, University of Applied Science and Technology, Tehran, Iran.

Other Professional Experience

December 2012 – Now:

Company: [ISIS Forensics Ltd. \(UK\)](#)⁶.

Role: Technical Consultant (occasional).

Duties/Project: Design and development of forensic linguistic solutions (gender and age profiling of online personas).

Supervisors: Dr. James Walkerdine, Dr. Phil Greenwood.

⁴See also <http://hdl.handle.net/11356/1043> and <http://hdl.handle.net/11356/1042>.

⁵The core idea behind this project came from Dr. Damir Cavar during the 3rd DGFS Computational Linguistics Fall School. The idea was then realised by generous advice from Dr. Tomaz Erjavec.

⁶Now known as [Relative Insight](#).

September 2006 – December 2007:

Company: Text and Speech Technology (Ltd), Tehran, Iran.

Role: Co-Founder and Consultant.

Duties: The company was founded together with my former colleague, Mr. Majid Namnabat. The focus of the company was on the development of language technologies for Farsi. During this time, in addition to technical support, I was in charge of writing proposals for national research institutes and bidding projects from several companies. Although I still hold a share of the company, I have not been involved in any of the company's activities since December 2007.

Contributions: Successful grant applications for the development of language resources for Farsi-English machine translation (through [ITRC](#)); development of a Farsi text-to-speech system and its integration with Microsoft Windows Speech API to be used together with the [JAWS screen reader](#) (through Artificial Intelligence Rayvarz Co.).

Collaborators: Mr. Majid Namnabat and Dr. Saeed Rahimi (currently a lecturer at Sharif University of Technology).

2005–2006 (In a Number of Occasions):

Company: Lexical Computing Ltd. (i.e., the [Sketch Engine](#)), UK.

Role: Consultant.

Duties: Development of language resources for statistical Farsi-English machine translation; helping with various issues when the company developed a Persian Web Corpus.

Supervisor: Dr. Adam Kilgarriff.

September 2004 – September 2006:

Company: Digital Clone (Shegarf), Tehran, Iran.

Role: Localisation Team Leader.

Duties: Development of language technologies for Farsi and software localisation in the context of the [CloniZER](#) project. In this role, I managed a team of 7 people for the development of three sub-projects including text-to-speech, voice command, and spell checking for Farsi. In this role, I also actively contributed towards the design of the spell-checking tool as well as the phonemic transliteration of Farsi text (including the detection of stress, duration, and pitch) in the text-to-speech system.

Supervisor: Mr. Heydar Semyari.

March 2004 – August 2004:

Company: [Artificial Intelligence Rayvarz](#), Tehran, Iran.

Role: System Analyst and Developer (part-time).

Duties: Research and development for a Farsi text-to-speech system, enhancing the output of the company's optical character recognition engine for Farsi.

Supervisor: Mr. Hossein Mirheydari.

Note: Due to several reasons, such as the involved intellectual property holders in the text-to-speech project, I had a continuous engagement with the company until December 2007.

Other Professional Services

- Member of the Association for Computational Linguistics (ACL), and of the Artificial Intelligence Association of Ireland.
- Participation in the WP3 of the IC1207 COST Action: [PARSEME \(PARSing and Multi-word Expressions\)](#).
- Reviewer for a number of conferences such as ACL, AEPC, EACL, EKAW, ESWC, ISWC, LREC, NLDB, WWW.
- Reviewer for journals of Data & Knowledge Engineering, IEEE Transactions on Systems, Man and Cybernetics, IEEE Access, and Natural Language Engineering.

List of Published Language Resources

- The Farsi Section of PARSEME Shared Task Data (v. 1.0) : multilingual corpora annotated with verbal multiword expressions, Published through LINDAT/CLARIN digital library at Institute of Formal and Applied Linguistics, Charles University in Prague, <http://hdl.handle.net/11372/LRT-2282>.
- ACL RD-TEC 2.0: An annotated corpus for evaluating term and entity recognition methods(together with Schumann, Anne-Kathrin), Published through LINDAT/CLARIN digital library at Institute of Formal and Applied Linguistics, Charles University in Prague, <http://hdl.handle.net/11372/LRT-1661>, ISLRN: 178-746-003-351-0.
- ACL RD-TEC: A Terminological resource in the domain of computational linguistics; ELRA Catalogue Reference: ELRA-T0375, ISLRN: 699-305-362-089-6.
- Persian Lexicon: A lexicon of more than 40,000 non-inflected Farsi words with rich semantic and morphological annotations as well as phonemic transliteration; ELRA Catalogue Reference: ELRA- L0087, ISLRN: 547-614-436-004-7.
- FASpell: A dataset for the evaluation of spell checking algorithms; available through LINDAT/CLARIN digital library at Institute of Formal and Applied Linguistics, Charles University in Prague, <http://hdl.handle.net/11372/LRT-1547>.
- Persian MULTEXT-East Framework Lexicon: A small lexicon of 13,427 inflected words in Farsi with morphosyntactic annotation and phonemic transliteration. ELRA Catalogue Reference: ELRA-L0086, ISLRN: 884-966-712-343-0.
- Persian 1984 Corpus: Farsi translation of Orwell’s *1984* manually annotated with phonemic transliterations and morphosyntactic tags according to specifications proposed in the MULTEXT-East framework. ELRA Catalogue Reference: ELRA-W0054, ISLRN: 851-240-629-673-1.

Apart from the ELRA distributions, Farsi sections of the MULTEXT-East resources are available through CLARIN.SI:

- MULTEXT-East ”1984” annotated corpus 4.0: See <http://hdl.handle.net/11356/1043>.
- MULTEXT-East non-commercial lexicons 4.0: See <http://hdl.handle.net/11356/1042>.

Talks

- *PPP-Hashing and PeARS: A Hashing Technique for Distributed Semantic Indexing*, Computer Laboratory, University of Cambridge, UK. 10 November 2016.
- *Distributional Semantics for Identifying Co-Hyponym Terms in Specialised Corpora*. Computational Linguistics Department at Heinrich-Heine-Universität Düsseldorf, Germany. 02 October 2015.
- *Identifying co-hyponym terms from special corpora*. Ubiquitous Knowledge Processing (UKP) at TU Darmstadt, Germany. 27 May 2015.
- *Extracting terminological resources and co-hyponym terms: the use case of building technology profiles*. Forschungskolloquium im Sommersemester 2015, Philosophische Fakultät, University of Passau, Germany. 05 May 2015.
- *What a pioneer in digital humanities really needs to know about distributional semantics*. Forschungskolloquium im Wintersemester 2014/15, Philosophische Fakultät, University of Passau, Germany. 16 December 2014.
- *Vector spaces for information extraction*. INSIGHT Workshop on Latent Space Methods, University College Dublin (UCD), Ireland. 17 January 2014.
- *Relational tuple extraction from text*. Research Seminar at the Language and Linguistics Department of Sharif University of Technology, Iran. 08 February 2012.
- *Formalising morphosyntactic specification of Farsi in MULTEXT-East framework*. Research Seminar at the Language and Linguistics Department of Sharif University of Technology, Iran. 8 February 2012.
- *Towards technology structure mining from scientific literatures*. During a Visit to the Chair of Computational Linguistics (Prof. Dr. Anette Frank). 03 March 2011.
- *Technology structure mining*. DERI Friday Talk Series, National University of Ireland, Galway. 05 March 2010.
- *Populating the Semantic Web with Relations from Text*. DERI Reading Group Series, National University of Ireland, Galway. 03 February 2010.
- *Use of Ontologies for Dialogue about Audiovisual Data*. Workshop on Spoken Dialogue Management Systems, Ulster University at Jordanstown, Northern Ireland, September 2008.
- *The Farsi corpus project and morphological analysis of Farsi*. Student Conference on Empirical and Computational Linguistics (JSSECL WS CECL 2006), Zadar, Croatia. 16 September 2006.

Extracurricular Activity

I try to remember that life is too short! I love long distance walks for reflection, as a tool for being mindful and grounded. I also like thinking about very abstract, scattered, and unrelated things—it is a kind of luxury when you are supposed to remain focused at all time. I like the cinema of Wes Anderson and Abbas Kiarostami. From time to time, I enjoy drawing ordinary things that I use in my daily life. I love yoga (it is not a girly thing to do!).
